# Jabra Plus Management.
Managing devices,
made easy.

Jabra Plus Management is a comprehensive and secure device management platform that gives you complete oversight of all the meeting rooms and Jabra devices in your care around the world.

Scalable remote management

- Real-time monitoring of all your audio and video conferencing room solutions across every location.
- Locate, diagnose, and trouble-shoot devices easily.

Easy to use

- Get an at-a-glance real-time overview of all your devices.
- Set dashboards up the way you want them.
- Get ahead of issues fast with color-coded device status indicators.

Optimize your devices

- Enable automated firmware updates for all or some devices.
- Schedule updates when you want, including out-of-hours.
- Update configurations to change the settings and experiences of all or some devices.
- Empower employees to personalize and update their devices with the Desktop App.

Secure by design

- Built on Microsoft Azure.
- Highly secure with end-to-end encryption and single sign-on integrations.
- Enable the IT team to easily access the platform securely from anywhere.

Device management at your fingertips

Manage the full range of video conferencing room solutions and personal audio devices with Jabra Plus Management.
